HAZARDS & IMPACTS	<ul style="list-style-type: none"><li><b>Total Snowfall:</b> Up to 2" across Orange County Tuesday night. An inch or less across the remainder of the Lower Hudson Valley, interior NE NJ and inland S CT. This will result in slippery road conditions which could impact the morning commute.</li><li><b>Ice Accumulation:</b> Up to a tenth of an inch across Orange County. A trace to a few hundredths of an inch is possible across interior NE NJ and the Lower Hudson Valley. Conditions will be slippery on any untreated and elevated surfaces which could impact the morning commute.</li><li><b>Temperatures:</b> Upper 20s to lower 30s Tuesday night into early Wednesday morning. Temperatures rise to above freezing everywhere around 7 am Wednesday morning.</li></ul>
NWS ALERTS	<ul style="list-style-type: none"><li><b>Winter Weather Advisory :</b> Orange County</li></ul>
FORECAST CHALLENGES	<ul style="list-style-type: none"><li>Wintry precipitation may move in as early as late Tuesday afternoon, but generally after 7 pm. A changeover to plain rain will occur through the night but possibly as late as 7 am Wednesday for Orange County.</li><li>A track closer to the coast would result in less snow and ice, while a track farther offshore could result in slightly higher amounts.</li></ul>
NEXT BRIEF	<ul style="list-style-type: none"><li>By 6 am Tuesday.</li></ul>
